DIED WITH PNEUMONIA

Sudden Death of Mrs. E. G. Rogers
After Only a Week's Illness.

The friends and relatives of Mrs. E. G. Rogers were shocked yesterday morning to learn of her death which occurred at 6:30. She had been ill for some time but her condition was not considered serious, but early in the morning she took a sudden change for the worse and died shortly after. Relatives at Florence and Bisbee were at once notified by telephone and telegraph and the funeral will take place this afternoon from the Nephri school house. The services will be conducted by the Mormon church and the interment will be made at the Mesa cemetery.

JUNIOR PICNIC.

The members of the Junior class of the Normal held a picnic yesterday. A large hayrack furnished transportation for the crowd and Dr. Blome went along to see that none of them were lost. They went to Echo canyon first, presumably for the purpose of hearing themselves talk, and later drove on to Paradise valley. All returned late last evening, none the worse for the trip.

PERSONAL MENTION.

Harry Thompson made a business trip to Phoenix yesterday afternoon. Chaplain Winfield Scott this morning returned from Tucson where he had been attending the monthly meeting of the territorial university. Tempe was visited by a fine shower last night. It did not amount to much as irrigation, but it effectually laid the dust, which is something to be thankful for. W. T. Truster is advertising the sale of his personal property to take place on Wednesday, February 17. Mr. Truster and family will then move to California where they will locate.

A DOUBLE BIRTHDAY PARTY.

Misses Carrie and Pearl Haigler gave a party to their friends at their home Saturday evening to celebrate their double birthday. Miss Merriam assisted with the entertainment, which consisted of games and refreshments. Those present were Miss Haulot, Miss Curnow, Miss Decker, Mr. Charles Hill, Warren and Jenny Nichols, Grace Plummerfelt, Mary Mullen, Juanita

THE UNIVERSITY

A Celebration of Its Thirteenth Anniversary Last Friday.

Tucson, Feb. 6. (Special Correspondence of The Republican)—Mid-year examinations are finished and the students are enjoying a well earned rest of four days. The work has been very satisfactory, generally speaking, and considering the high character of the work done the "thinkers" are very few. The mining class leaves Saturday morning for a ten days' inspection of the Bisbee, Douglas and Cananea mines. All arrangements have been completed for an elaborate trip. The party will be made up of the mining and chemistry departments and will include fourteen students and two professors. Passes have been gratuitously given by the El Paso & S. W. railroad, also by the S. P. and over its branch line running into Cananea. Mr. Elmer Randolph, of the S. P. system, has favored the university in this way and many others to a considerable extent.

Professor William Phipps Blake, A. M., Ph. D., who occupies the chair of geology, mining and metallurgy in this institution, will soon take his class in geology and ore deposits on a trip into the Santa Catalina and Rincon mountains for the purpose of engaging in regular field work in these two sections. He is one of the few recognized authorities in geology and during his long life has been a steady contributor to the literature of mining, geology and engineering.

The University of Arizona owes more to Prof. Blake than any man that has ever been connected with the institution. During the last few years he has been untiring in his efforts to build it up. The museum, one of the best in western universities, has been brought to its present standing largely through his aid, and in every way possible he has advanced the standing of the school.

His career has been one which he may well be proud of. His first college work was taken at Sheffield college, Yale's scientific school, where he received the degree of Ph. D. Later he attended Dartmouth college and graduated there with the degree of A. M. As soon as he left college he took up his first active life with an assistant chemist in the New York Medical college in 1882. Later he accepted the position of chemist and mineralogist of the New Jersey Zinc company and upon leaving the company he took up the same work on the staff of the United States Geological Survey.

From 1883 to 1889 he was the editor of a mining magazine and journal of geology. From 1889 to 1894 he became mining engineer to the Japanese government and was the head of the mining department of the National college. In 1896 he was installed in the College of California as professor of geology and mining and in 1897 the government called upon him to take the commission to the Paris exposition. When he was in Paris he edited the reports to the U. S. government. Later he held the following responsible positions: Chief of staff of scientific research of San Domingo, commissioner from Connecticut to the International exposition in Philadelphia, chairman of classification committee at that exposition, commissioner to the Vienna exposition in 1873, U. S. Commissioner to Paris world's fair 1878, and secretary scientific commission, mining section, from 1878 to 1895. In 1895 he was installed in the chair he now holds at the University of Arizona and is territorial geologist and director of school of mines for Arizona.

Only those who have worked under him can tell of his strong personality, his skill and ability in the class rooms and his power of imparting his knowledge to the students under him. His lectures are so valuable instructive for the reason that they are delivered by a man who for fifty-two years has been a practical worker in the world's field, because his work and his experience is world wide. He has been active in research work in Russia, England, Germany, France, Australia, Alaska, South and Central America, Mexico, Canada, Alaska and the United States. His work in Japan and Hawaii has been spoken of before.

No student leaves his class room without having been benefited in more ways than can be counted with him. The students of the university have enshrined in their hearts the genial man who has always sympathized with and worked for them, and all hope that he will remain with them for many years to come.

A small university like our own is indeed fortunate in the acquisition of a man of his stamp and calibre. Prof. Blake is now supervising and representing the exhibits which the mining men of Arizona are sending to the world's exhibition at St. Louis this year.

Professor R. H. Forbes is making a preliminary survey of the lower Colorado river and the Gulf of California and the adjacent country. This preliminary work is being done to see if the country warrants more extensive exploration by the government of the United States.

Friday afternoon at 3:30 the two and one-half year old child of Mr. and Mrs. Hugh Dana strangled itself in a high chair and the mother is almost frantic with grief. Mrs. Dana, with the two children, were at their home one and one-fourth miles south of Mesa. Mr. Hugh Dana was away after a load of wood. The children were playing on the floor and Mrs. Dana, having to go out for a few moments and fearing the older child might hurt the boy, set him in a high chair, buckling the usual strap across the front to keep the child from falling out. She was away only for a few moments, but in the meantime the child had slipped under the strap which caught across its throat under the chin and had choked the life from its little body. Mrs. Dana, almost frantic, rushed to her child and finding it lifeless, wild with grief, gathered it in her arms and rushed to the child's grandma, nearly a quarter of a mile away, and although everything possible was done for it, it proved futile.

Mrs. Dana is crazed with grief and it is feared she will lose her reason. A man was dispatched for Mr. Dana on horseback, but could not find him, and he didn't return until the next day.

The entire community is horrified over the sad occurrence and their feelings go out in sympathy to the distressed ones. The funeral services were held Saturday at 2 p. m. at the Alma meeting house.

A NEW GIRL.

A telegram received yesterday from Mr. Adam Brewer announced the arrival of a big boning girl at his home Saturday morning. The mother, formerly Mrs. Ina Pomeroy Brewer, is doing nicely. Congratulatory telegrams kept the wires hot yesterday from the many relatives in Mesa.

PERSONAL MENTION.

Mr. W. H. Wallace and his daughter Mollie Wallace, were visitors to Phoenix yesterday over the P. & E. Mr. Wallace went down to attend the organization of the William Randolph Hearst club.

Prof. J. D. Loper was a business visitor to Phoenix yesterday over the M. & P. He attended and was made temporary chairman of the William Ran-

\$1,000 REWARD TO WEAK MEN

A Message to Men Who Want Strength

I HAVE perfected a new Belt, better and stronger than I have ever made before, a Belt which will transform the weakest, puniest specimen of "half man" into a perfect cyclone of strength, and I want every man to use it. I want a test case. Therefore, I offer \$1,000 in gold to any weak man who will use this Belt under my direction for four months and then show by examination of any reputable physician that he is not cured, sound and well.

This is especially directed to men who have doctored for years without benefit. I want men with Rheumatism, Pains in the Back, Weak Kidneys, Sciatica, Lumbago, Varicocele, Prostatic Trouble (I cure by a new method), Locomotor Ataxia, Torpid Liver, Indigestion and Dyspepsia. All of these troubles in chronic form I can cure with this new Belt, even after all other treatments have failed. To every weak, debilitated man who wears this new Belt I give my electric suspensory for men without charge.

This attachment is made for the purpose of treating all special ailments of men, and assures a cure of all waste of strength, early decay and debility. Its current is invigorating and wonderful in power.

If you can call, come and see me, and I will show you my new Belt and prove to you that it is a wonderful device. You can feel the glowing current of life that flows into the weakened nerves. I will show you letters from your own neighbors telling how I cured them. I have over 50,000 testimonials in the past 21 years.

If you can't call, write, and I will send a book describing my new method, with letters from many grateful men and women. If you write send this ad and I will send the book, sealed, free. Cut the ad out and act to-day.

NEVER SOLD IN DRUG STORES OR BY AGENTS.

Dr. M. C. McLaughlin, 129 South Spring St., Los Angeles, Cal.

Office Hours, 9 a. m. to 8 p. m.

United States. Professor Forbes will be gone about two weeks and very favorable reports are anticipated on his return.

The University of Arizona Monthly is out for February with a batch of new literature.

A party of students have gone into the Catalinas for several days' hunt. Class work will be resumed in all the departments on Monday.

Friday the 5th was the thirteenth anniversary of the founding of the University, necessarily a big day in the history of the institution. Friday was also Arbor Day and Freshman class day. Considerable time was given to the advantages with which the university has been forced to contend, to one thoroughly conversant with its history, the results have been wonderfully satisfactory.

Friday evening at the regular meeting of the Philomathean Literary society, Professor W. W. Skinner repeated his illustrated lecture which he gave before the Cosmos club last week. The society gave its usual good programme. Dr. Babcock entertained the parliamentary class at his home on the campus. The president is teaching this class in addition to his regular work and naturally takes considerable interest in the progress of the class. The members of the class who were present feel highly honored in being so royally entertained.

Adrian Barnard left for Nogales Thursday evening. He will be gone about ten days on a hunting trip into old Mexico.

Fritz Barnard left for Los Angeles Saturday evening for a short visit. Ward Harrison, of San Francisco, and a prominent member of the Delta Tau Delta fraternity, has been visiting the University.

The A. B. D. club was entertained Saturday evening at the home of C. A. Thomas. The Knickerbocker club gave Miss Winfield Hill a surprise party Friday evening.

There was the annual class rush between the Freshmen and Sophomores. The Freshmen during the night had tied a 66 flag to the top of the flag pole and from sunrise on for an hour or more it was the desire of every Sophomore to tear it down.

Miss Grace Von Allstine returned to Los Angeles Saturday evening and Miss Bertha Goldfield was initiated into the club to fill the vacancy.

After the battalion parade and inspection, Governor Erodie reviewed the battalion in company with Colonel Leavell and the board of regents. In his address to the students in the gymnasium the governor complimented the cadets on their soldierly appearance and efficient drilling. He also expressed his satisfaction with the work being done at the University in every respect and spoke in particular of the college spirit shown by the student body. Colonel Leavell had a few remarks to

make in favor of the companies and the manner in which they were handled. Dr. Babcock concluded the speaking with a few well chosen words about the work accomplished the past semester

and the advancement noticeable in the hearty co-operation of all connected with the University. He stated that the enrollment was slightly over 200, the largest in the history of the institution.

After the meeting adjourned Governor Erodie and the other officers of the college made an inspection of the dormitories. A large crowd from Tucson was out to witness the exercises.

A PHYSICIAN'S OPINION.

Following is the statement of a doctor who puts truth above so-called "professional etiquette," and candidly states his belief and experience for the benefit of the masses who may read it. That man is Dr. C. F. SMITH, the most successful physician of Olean, N. Y.

"I wish to add my professional testimony to the value of your English preparation, known as Acker's English Remedy for Asthma, etc. In several instances after I have tried my utmost to give even relief, I have prescribed your remedy, and it has acted almost like a miracle, not only relieving but permanently curing every one of the patients. I endorse the above preparation as one of the most valuable additions to the practice of medicine."

(Signed) C. F. SMITH, M. D.

Such a frank endorsement as the above is phenomenal. Coming from so distinguished a member of the medical profession, it carries with it an assurance which the public will be sure to avail themselves of. It is recommendations like this which make it possible to give the broad guarantee that is a part of every sale of

ACKER'S ENGLISH REMEDY

for Coughs, Colds, Asthma, Bronchitis and Consumption. It must either do all that is claimed for it, or your money will be refunded. Do you know of any other medicine sold on those terms? Do you know of any other medicines which prominent doctors regularly prescribe in their own practice as being better than prescriptions they write themselves? These facts are well worth considering. They are of special interest to those with sore throats and weak lungs. Remember we sell every bottle on a positive guarantee. 25c., 50c., and \$1.00.

Sold and Guaranteed by the T. F. HUDSON PHARMACY, Distributing Agents.
